

Mr. Diaz began the meeting by reviewing ground rules.
SIP team agreed to ground rules.
Mr. Diaz reviewed meeting outcomes.

Goal: Students Achievement:

Team agreed to cut benchmarks out of the SIP.
Benchmarks will be replaced by the in house assessment (Curriculum Based Measurement, CBM).

This is happening because the benchmark has been restructured and is being implemented in its current format for the first time.

Also, we have started using the CBM regularly. It makes sense to review this data as a data point.

CBM frequency is still to be determined (Chaney needed). Tentatively it will occur during the beginning of the year, middle of the year and end of year. Middle of the year testing occurs because we usually bring in a new cohort of students mid year.

Rubrics will be presented to leadership team to begin garnering feedback.

Goal: Technology:

School Climate:

Overall, a new survey suggested a decline in school climate.
Discussions took place referring to figuring out why that decline occurred.
No course of action was decided on.

Participation in the survey increased.

Parent support web site is up and running
Website is bi lingual and contains information pertinent to parents.
Information came from counselors and support staff.

Contact forms (opportunity should be created for students input)

Discussed the need for Rubrics in order to begin assessing how frequently we are teaching to the instructional goals at Phillips
