	<p>model</p> <ul style="list-style-type: none"> • We need to find our persistency rate to see if it might fit into a model for our school • Split highest percentages between persistency and growth • Possible consideration in a new model for Phillips: individual student attendance growth • If we submit our own rating system we should consider using terminology that aligns with our evaluation model (proficient, distinguished, etc) • The state gave example of calculation of data to find your baseline and calculate future numbers • Mr. Colvin will send out document for team to review: pay close attention to Carteret County, and Macon County • Criteria Parameters we want to measure: Persistency, EOC Proficiency (not growth), and Growth • Look at what we do well that we can measure to add to our school model • Accountability Model is all about school improvement • TEAM TASK: • Create criteria that is not too watered down and not too high to reach •
